	(0.018)	(0.014)	(0.010)	(0.010)
Observations	13,737	13,737	13,737	13,737
School, year fixed effects	Yes	Yes	Yes	Yes
Controls	No	Yes	No	Yes
Institution-specific time trends	No	No	Yes	Yes

Notes: The sample includes 731 institutions for 19 years. All regressions are weighted by average cohort size. Within each panel and column, point estimates come from the same regression. The left-out category is G0, the pretreatment years, and is defined as (k-4) for the four-year graduation outcome and (k-6) for the six-year graduation outcome. Standard errors are reported in parentheses and clustered at the institution level. Results are robust to holding constant the sample size across the columns.
